

1AM and 2AM for Mixing
4AM and 6AM for Agitation
1AM - 6AM for Pump Drive

Air Motor Rotary Vane Technology

Portable Mixing or Agitation

Batch Chemicals (paints, stains, epoxy, coating, sealants, adhesives, oil or grease and base chemicals):

- Semiconductors.
- Laboratory.
- Specialty Chemicals & Materials
- Automotive.
- Electronics.
- Textiles.

Pumping

Motor drive for liquid rotating pumps :

- Transfer pump.
- Drum pump.
- Peristaltic pump.
- Other pump (drive magnetically coupled).

Portable Pump + Mixer Systems

Configurable for custom pumping applications or skid-mounted systems:

- Create a portable system with air-driven pump(s) and mixer(s) integrated into a skid.

* Requires compressed air

Portable / Compact / Lightweight

- Smaller than a comparable electric motor
- Power supply when electricity is unreliable
- Operable in remote locations*

Inherently Safe for Hazardous Duty

- Non sparking
- Runs cool
- Can be stalled
- Safe for overload
- Low Maintenance

Versatile

- Reversible
- Variable speed and torque
- Flexible mounting

Factory and Local Distributor Supported

- Warranty
- Parts and Service
- Engineering

EC directive 94/9EC (ATEX 100a). They are intended to be used in zones 1 and 2 where explosive atmospheres are likely to occur.
