Rocking Piston
Compressors and Vacuum Pumps
For over 90 years, Gast Manufacturing has been providing innovative air solutions to a broad breadth of customers. With the relatively recent addition of JUN-AIR, we have expanded our capabilities and formed, “The Gast Group.” Together, our diverse engineering background and pneumatic experience allow us to provide both component and system solutions to meet all of your pneumatic needs...all backed by our strong commitment to quality and customer support.

Products for Almost Any Application – Worldwide

We offer an extensive and versatile line of air-moving products, including vacuum pumps, compressors, air motors, gearmotors, vacuum generators, and regenerative blowers. We design and build these components for original equipment manufacturers worldwide, but we also develop complete pneumatic solutions to solve tough customer challenges.

To ensure fast, efficient delivery of products, Gast has a vast network of sales representatives/distributors throughout the United States and the world. Plus, we maintain direct sales and service facilities in Europe, Hong Kong, and Shanghai, China.

Unparalleled Design Expertise

Unlike other manufacturers, who might expect you to modify your pneumatic system to fit their available product(s), Gast is committed to finding the right product to meet your specific needs. If we don’t have a high-quality, off-the-shelf product to fit your existing application or meet your anticipated needs, we’ll propose customized cost-effective design options that will serve your special requirements. We can even develop and produce your complete pneumatic system for you.

Our experienced Research and Development engineers and Product engineers work together to analyze customer needs and use computer-aided design to generate timely solutions for air-handling problems. The design team has one goal: to create problem-solving solutions that capitalize on the latest available technology, meet all application requirements, and benefit from cost-effective production methods. The end result: products and solutions that are the best value in the marketplace for our customers.

A Lasting Commitment to Quality

We invest heavily in both equipment and people to maintain the consistent quality for which our products are known worldwide, and we have done so since day one. As early as 1983, we implemented a total quality process designed to ensure the quality of our products. In keeping with that tradition, Gast has achieved ISO 9001 certification, making us a member of the elite group of manufacturing companies in the world to receive that certification.

European Community Directives

With extensive sales outside the United States, Gast has pledged to conform to the European Community Directives. These directives contain essential requirements concerning health, safety, environment, and consumer protection for all products targeted for the European Community market. Currently, all Gast products available for sale in the European Community are in compliance with the Machinery, Low Voltage, and Electromagnetic Compatibility Directives.
Why use a Rocking Piston Product?

Variety

Gast oilless Rocking Piston air compressors and vacuum pumps, available in single, twin, miniature, and tank-mounted styles, are the perfect choice for hundreds of applications. Choose from dual frequency, shaded pole, and permanent split capacitor (psc) electric motors with AC multi-voltage motors to match North American, European, and worldwide power supplies. A complete line of recommended accessories as well as 6, 12, and 24 volt DC models in brush and brushless types are also available.

Performance

The rocking piston combines the best characteristics of piston and diaphragm air compressors into a small unit with exceptional performance. Air flow capabilities from 3.4 LPM to 5.5 CFM (9.35 m³/h), pressure to 175 psi (12.0 bar) and vacuum capabilities up to 29 inHg (31 mbar). Horsepowers range from 1/20 to 1/2 HP (0.04 to 0.37 kW).

Reliable

These pumps are made to stand up through years of use. The piston rod and bearing assembly are bonded together, not clamped; they will not slip, loosen, or misalign to cause trouble.

Clean Air

Because Gast ROC-R pumps are oil-free, they are ideal for use in applications in laboratories, hospitals, and the food industry where oil mist contamination is undesirable.

How Does a Rocking Piston Pump Work?

In a reciprocating motion, a flexible cup mounted on top of the connecting rod creates vacuum or pressure as the cup maintains a seal against the cylinder walls in a rocking motion.

Gast Compressors and Vacuum Pumps Performance*

*Shown here are performance ranges of our positive displacement models. Performance shown on inside charts is for continuous operation. Higher performance is possible on an intermittent basis (10 min. on/10 min. off) for some of the models listed. Consult Factory.

PSC - Permanent Split Capacitor  ShP - Shaded Pole motor

Catalog Performance Specifications

The specifications listed are that of a unit at sea level with an ambient temperature of 70°F (21°C), operating with normal electrical current conditions. The figures stated in this catalog are nominal approximations for models without accessories. Intake filters and exhaust mufflers, and the accumulation of contaminants in them during operation, will decrease the flow of air as well as the achievable pressure.

The units that we list in this catalog are a small portion of what we actually make. Those listed are considered "standard units" and are normally available from stock in small quantities. Variations are produced for many customers and by passing on to us the application specifications we might find an existing unit that fits your requirement. If we don’t and the quantity is sufficient, we will design a “special unit” for the application.

Pictorial and dimensional data is subject to change without notice.

The information presented in this catalog is based on technical data and test results of nominal units. It is believed to be accurate and is offered as an aid in the selection of Gast products. It is the user’s responsibility to determine suitability of the product for intended use and the user assumes all risk and liability whatsoever in connection therewith.

4 Gast Rocking Piston Compressors and Vacuum Pumps www.gastmfg.com
### Typical Applications

#### Medical Applications
- Oxygen concentrators
- Eye surgery equipment
- Ventilation equipment
- Surgical aspiration equipment

#### Dental Applications
- Dental vacuum ovens
- Dental compressors
- Portable dental equipment

#### Laboratory Applications
- Lab test equipment
- Body fluid analysis
- Vacuum filtering
- Vacuum centrifuge

#### Other Applications
- Vacuum food sealer
- Tire inflation equipment
- Automotive suspensions
- Auto detailing equipment
- Refrigerants reclamation
- Dry sprinkler system
- Beverage dispensing
- Cable pressurization
- Vacuum frames
- Core drilling
- Paper counting machines
- Vacuum mixing
- Handicapped accessible doors
- Diving air

- Use as compressor or vacuum pump (same model)
- Maintenance-free ball bearings are sized for long life
- Cup and valve are easily field serviceable, if required
- Alternate stroke options available
- Custom mounting configurations available
- Head mounts in any of four positions
- Heads available with threaded or barbed ports
- Motor equipped with Electromagnetic Interference (EMI) Suppression
- Head assembly of chemical and heat resistant PPS for corrosion resistance
- EPDM (Ethylene Propylene Diene Monomer) valve and Neoprene valves

*Speed can be varied by customer supplied electronics

Note: These units can be configured for either staged vacuum or pararrel pressure operation.

Staged vacuum units capable of 27.5 inHg maximum vacuum.
Parallel pressure units capable of 20 psi continuous duty (approx. twice the flow shown in graphs)

**Product Performance**

A: 24V DC
B: 1575 RPM
C: 1275 RPM

Pressure flow with one head running at max. vac.
Vacuum flow with one head running at 30 psi.

Dashed lines indicate intermittent duty

- Pressure/vacuum simultaneously in a very small package
- Very low noise levels approx. 55 dBA
- All wetted aluminum parts treated for corrosion protection from moisture
- Very low power consumption (approx. 75 watts - AC version, 50 watts - DC version)
- Long life/non-service life (up to 12,000 hours depending on application)

Product Performance

- Oilless operation
- Motor mounted
- Rugged construction / low maintenance
- Low noise levels
- Muffler/filter AH190,
  Capacitor AF873A (DB and DD motors)
  Capacitor AF485A (FB motor) included

* Includes 10 foot cord, switch, and plug
† Includes 2 meter European color coded cord (no plug)
GAST
ROA Lab Models
Miniature Rocking Piston

Shaded Pole Motor
100 psi max. pressure
25 inHg max. vacuum
0.8 CFM open flow (60 Hz)

Recommended Accessories
Repair kit K757

Includes
Pressure gauge AF806
Vacuum gauge AE136
Pressure relief valve AF887
Vacuum relief valve AA550C-V
Hose barbs AG613
Carrying handle AP523A
Rubber feet AF584A

* Units will start against 50 psi back pressure

- Oilless operation
- All wetted aluminum parts treated for corrosion protection from moisture
- Rugged motor shell construction
- Recommended Accessories:
  - Pressure gauge AF583
  - Relief valve AP202
  - Filter B300A
  - Repair kit K797A

Capacitors:
- AT251 (82R637-P135-H311CX) AT251B (82R642-P112-H302CX)
- AT251 (82R645-P135-H302CX)
- AT385 (82R645-P107-H304X, shipped with unit)

    - Depth: 6.45
  - **DC Unit**
    - Width: 9.42
    - Height: 239.3
    - Depth: 6.59

---

**Model 82R637 Series**
- 30 psi max. pressure
- 4.3 CFM open flow (60 Hz)
- 30 psi max. pressure
- 3.8 CFM open flow (BLDC)

**Model 82R642 Series**
- 100 psi max. pressure
- 4.4 CFM open flow (60 Hz)
- 100 psi max. pressure
- 3.2 CFM open flow (50 Hz)

**Model 82R637 Series**
- 30 psi max. pressure
- 4.7 CFM open flow (60 Hz)
- 30 psi max. pressure
- 4.1 CFM open flow (50 Hz)

**Model 82R645 Series**
- 30 psi max. pressure
- 4.9 CFM open flow (60 Hz)
- 30 psi max. pressure
- 4.4 CFM open flow (50 Hz)
